```

Il manque de vérifier le code de sortie ?

ou de fail/exit si ! -f /backup/jails/www00//run/sshd.pid ?

```
+ chroot /backup/jails/www00 /usr/sbin/sshd -E /var/log/authlog
++ cat /backup/jails/www00//run/sshd.pid
cat: /backup/jails/www00//run/sshd.pid: No such file or directory
+ pid=
```

Note : pas grave, mais y'a un / en trop au cat.
